Reasons for Allowance

1. Claims 1-18 are allowed.
2. The following is an examiner's statement of reasons for allowance:

The cited prior art taken alone or in combination fails to teach the claims invention of a computerized methodology associated with a goal wherein goal progress and related feedback motivates further progress toward the goal, related to information developed from goal activity, integrating such goal activity information and managing such goal information where such goal information is developed specifically from a linked list where each element of the linked list is related to a specific data record.

The closest prior art (Cook et al, WO 97/44766) teaches an agent based instruction system and method wherein the agent exhibits diverse behaviors that include encouragement and feedback, providing meta-cognition help on ongoing instruction, managing or controlling and individualized computer based instruction to the student's learning modes, and assistance with assignment management. Cook does not teach utilization of goal related information developed from a linked list where each element of the linked list is related to a specific data record. The claimed invention facilitates an instruction system that is based on the real-world consequences.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
